

Emily,

I took a look at the Regulations. I have a couple of comments. Since I don't know all the regs that this regulation is referencing these might already be answered.

- 1) Our HHW facility collects materials from schools/colleges, non-profit organizations, CESQGs and Public Works departments in our JPA member cities. This is not "household" waste. Does the definition of "household hazardous waste" need to be redefined to include these entities?
- 2) Does the word "material" need to have a definition? The regs crossed out HHW and put "material" but there is no definition associated with it.
- 3) The regs only ask for # of households participating but we record all our customers including schools, non-profits, CESQGs and city public works. Should the regs ask for these users of the facility as well?

Thanks,

Nicole Forte
